

# Diagnostic Analysis – Probit

## Calibration Plot – Probit

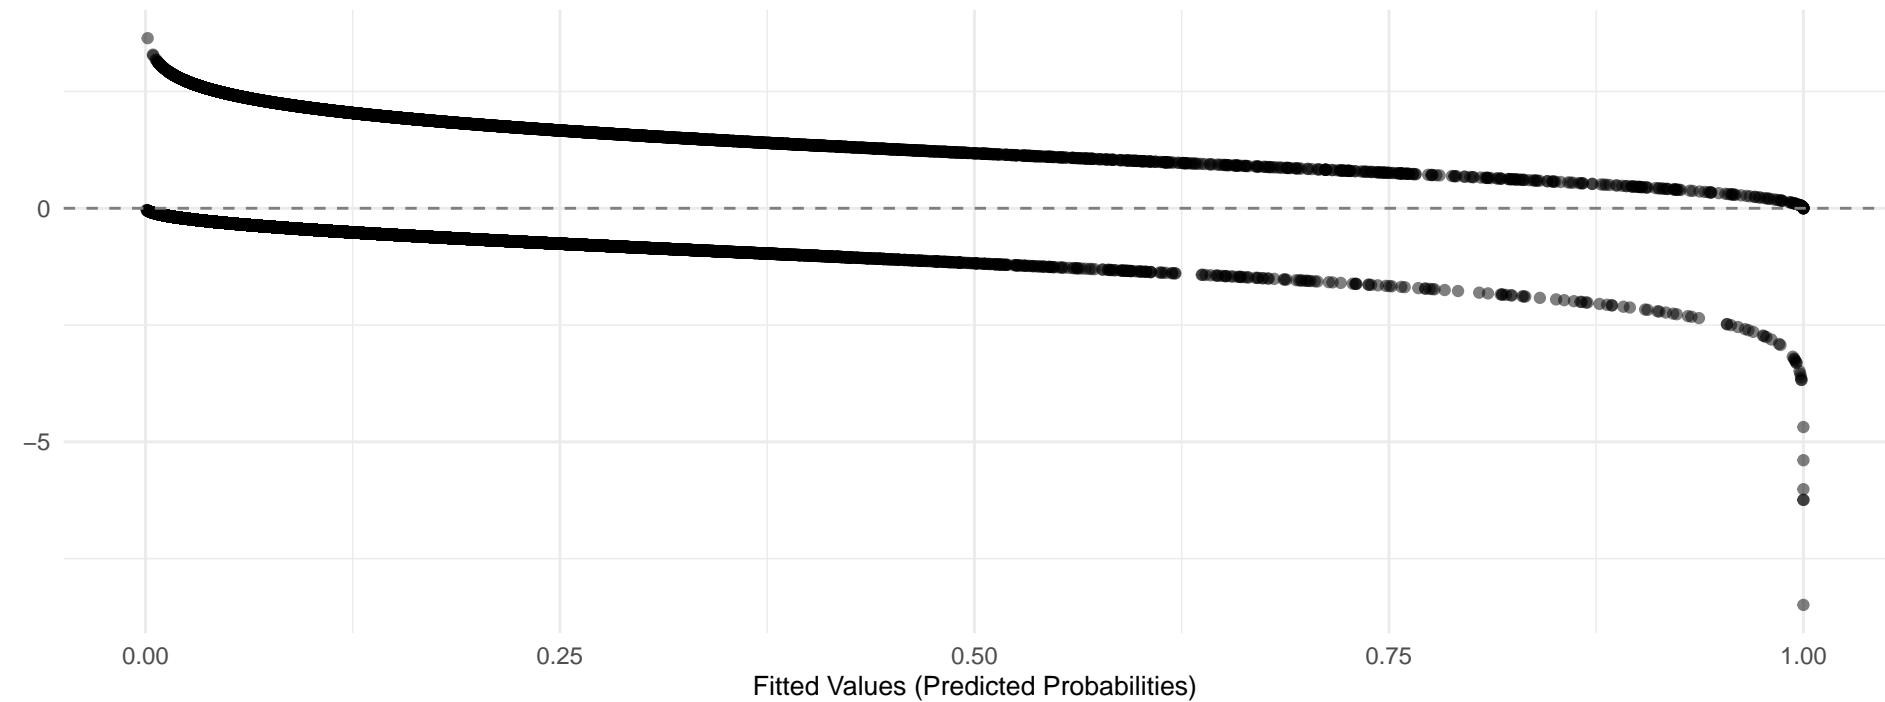

Hosmer–Lemeshow test:  $\chi^2 = 46.71$ , df = 8, p = 0.000

Observed Proportion

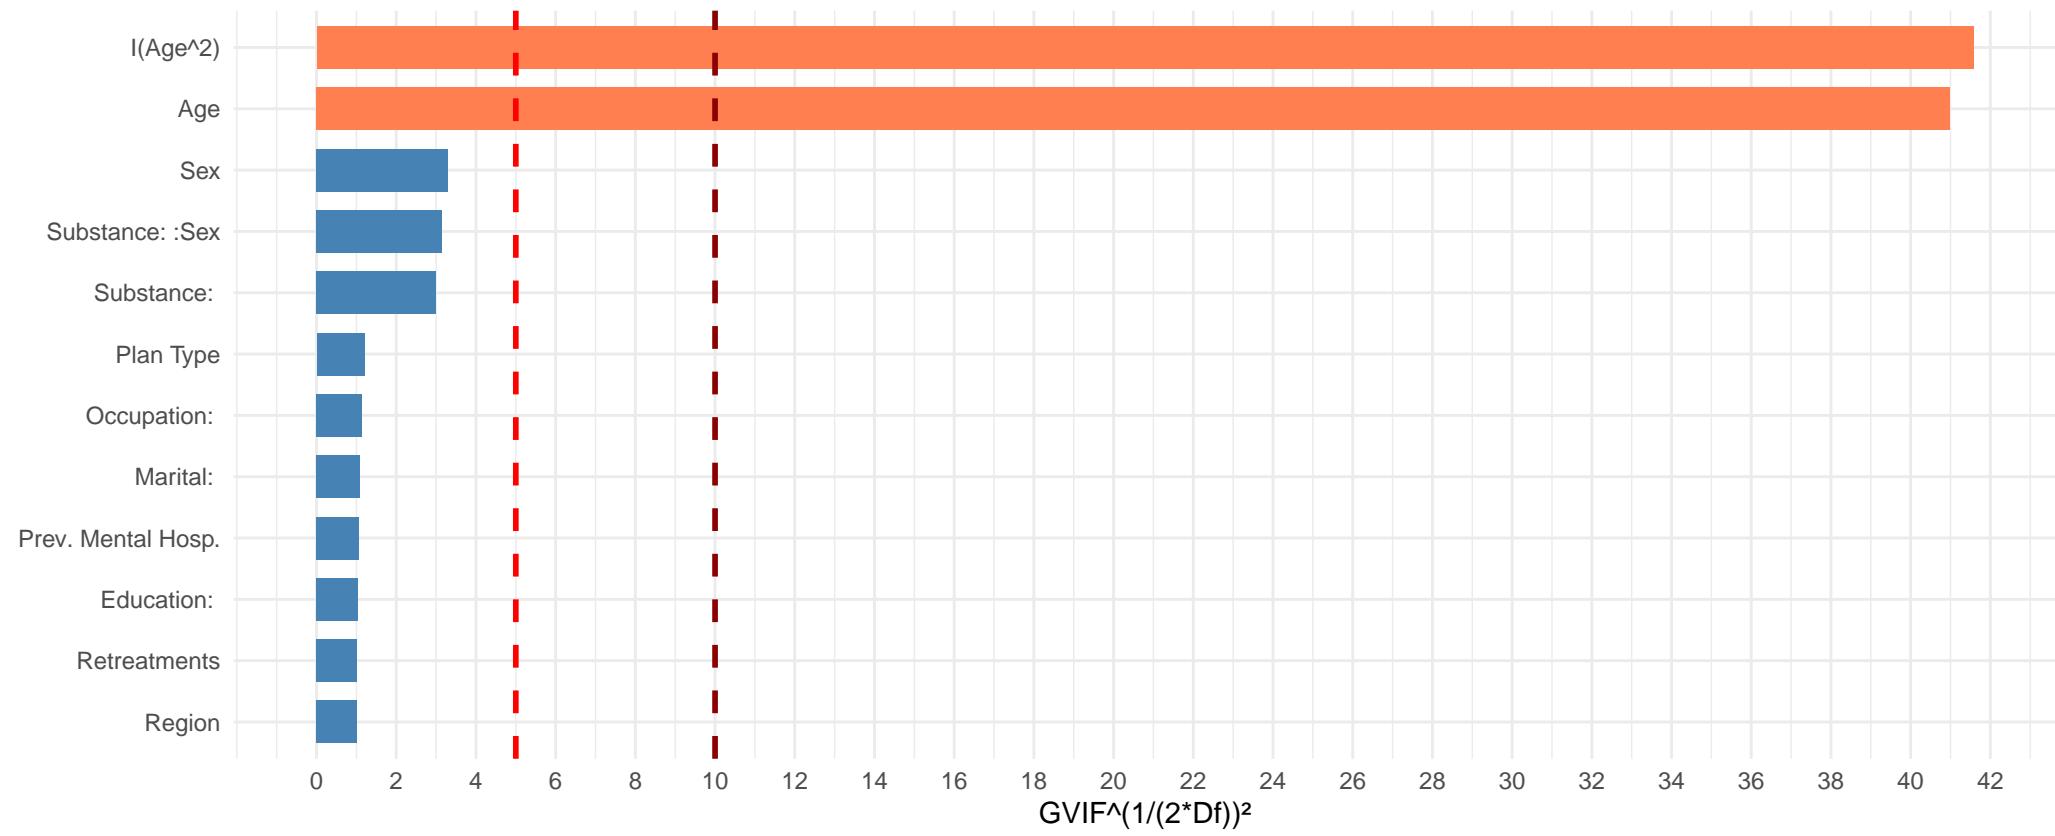

## Residuals vs Fitted Values – Probit

Deviance Residuals

## Multicollinearity Assessment (GVIF) – Probit

GVIF $^{(1/(2*Df))}$  squared values; Red lines at 5 and 10

GVIF < 5      GVIF = 5
