

Diagnostic Analysis – Probit

Calibration Plot – Probit

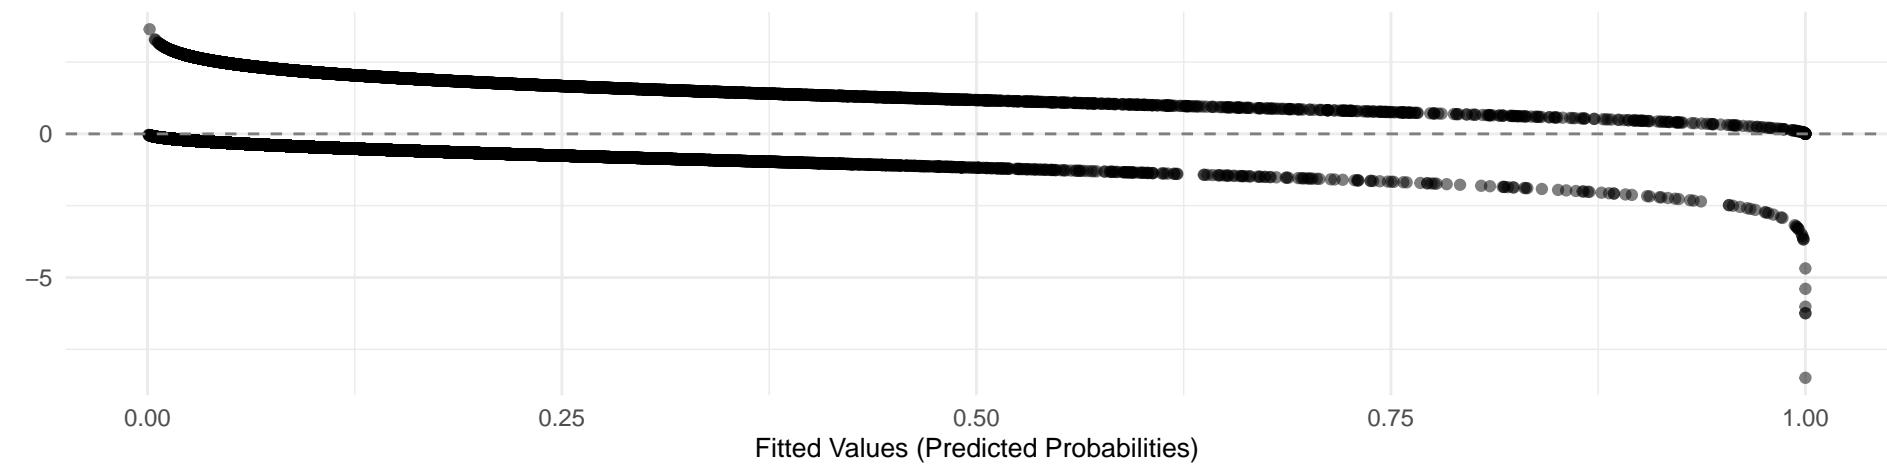

Hosmer–Lemeshow test: $\chi^2 = 46.71$, df = 8, p = 0.000

Observed Proportion

Residuals vs Fitted Values – Probit

Deviance Residuals

Multicollinearity Assessment (GVIF) – Probit

$GVIF^{(1/(2*Df))^2}$ squared values; Red lines at 5 and 10
